1 Symbol Reference

1.1 prjDirectoryCompressor Namespace

This is namespace prjDirectoryCompressor.

Functions

	Name	Description
∉ ♦	CompressFiles (see page 1)	recursive olarak belirtilen klasörü geziyor
		2. parametre ise
		Abbrevia adli sikistirma bileseninin bir nesnesi esas isi o yapiyor zaten

Variables

Name	Description
compressFileRec (☐ see page 2)	compressor: TAbZipper;
directoryPath (see page 2)	program bir console application burada önemli olan nokta ise eger bu exe dosyasi çalistirilirken parametre almissa aldigi parametre dosyalarin sikistirilacagi dizin oluyor ve ilgili metoda yönlendiriyor parametre almazsa bulundugu klasördeki dosyalari sikistirmaya yani ziplemeye basliyor Abbrevia bilesenini burada bir kere olusturuyoruz ve metoda gönderip isimiz bitince ortadan kaldiriyoruz
result (see page 3)	This is variable prjDirectoryCompressor.result.
zipper (see page 3)	This is variable prjDirectoryCompressor.zipper.

1.1.1 Functions

The following table lists functions in this documentation.

Functions

	Name	Description
=♦	CompressFiles (see page 1)	recursive olarak belirtilen klasörü geziyor
		2. parametre ise
		Abbrevia adli sikistirma bileseninin bir nesnesi esas isi o yapiyor zaten

1.1.1.1 prjDirectoryCompressor.CompressFiles Function

Pascal

procedure CompressFiles(directoryPath: string; compressor: TAbZipper);

File

prjDirectoryCompressor (≥ see page 3)

Created with a commercial version of Doc-O-Matic. In order to make this message disappear you need to register this software. If you have problems registering this software please contact us at support@toolsfactory.com.

recursive olarak belirtilen klasörü geziyor

2. parametre ise

Abbrevia adli sikistirma bileseninin bir nesnesi esas isi o yapiyor zaten

1.1.2 Variables

The following table lists variables in this documentation.

Variables

Name	Description
compressFileRec (☑ see page 2)	compressor: TAbZipper;
directoryPath (see page 2)	program bir console application burada önemli olan nokta ise eger bu exe dosyasi çalistirilirken parametre almissa aldigi parametre dosyalarin sikistirilacagi dizin oluyor ve ilgili metoda yönlendiriyor parametre almazsa bulundugu klasördeki dosyalari sikistirmaya yani ziplemeye basliyor Abbrevia bilesenini burada bir kere olusturuyoruz ve metoda gönderip isimiz bitince ortadan kaldiriyoruz
result (see page 3)	This is variable prjDirectoryCompressor.result.
zipper (≥ see page 3)	This is variable prjDirectoryCompressor.zipper.

1.1.2.1 prjDirectoryCompressor.compressFileRec Variable

Pascal

compressFileRec: TSearchRec;

File

prjDirectoryCompressor (see page 3)

Description

compressor: TAbZipper;

1.1.2.2 prjDirectoryCompressor.directoryPath Variable

Pascal

directoryPath: string;

File

prjDirectoryCompressor (see page 3)

Description

program bir console application burada önemli olan nokta ise eger bu exe dosyasi çalistirilirken parametre almissa aldigi parametre dosyalarin sikistirilacagi dizin oluyor ve ilgili metoda yönlendiriyor parametre almazsa bulundugu klasördeki dosyalari sikistirmaya yani ziplemeye basliyor Abbrevia bilesenini burada bir kere olusturuyoruz ve metoda gönderip isimiz bitince ortadan kaldiriyoruz

1.1.2.3 prjDirectoryCompressor.result Variable

Pascal

```
result: Integer;
File
prjDirectoryCompressor ( see page 3)
```

Description

This is variable prjDirectoryCompressor.result.

1.1.2.4 prjDirectoryCompressor.zipper Variable

Pascal

```
zipper: TAbZipper;
File
    prjDirectoryCompressor (② see page 3)
```

Description

This is variable prjDirectoryCompressor.zipper.

1.2 Files

The following table lists files in this documentation.

Units

Name	Description
prjDirectoryCompressor.dpr (see page 3)	This is file prjDirectoryCompressor.dpr.

1.2.1 prjDirectoryCompressor.dpr

This is file prjDirectoryCompressor.dpr.

Body Source

```
program prjDirectoryCompressor;

{$APPTYPE CONSOLE}

// AbZipper denen nesne sikistirma bileseni olan
// Abbrevia bileseninin bir uniti oluyor
// bu nesne sayesinde bir klasör içerisinde
// recursive bir sekilde arama yaparak
// bütün alt klasör ve dosyalari stek bir zip dosyasi olarak
// sikistirabilecegiz.
uses
WinTypes,
```
